

You can buy experience.....

Managing lift companies can be a daunting task, leave it to the experts.

With **over 100 years experience** locally and internationally Minc Elevator Consulting (MEC) delivers the experience required to **ensure confidence** in the services we provide.

MEC provides a **full range of services** to cover **all aspects of elevators, escalators and travelators** in a way not before seen in the vertical transport industry.

Our consultancy services range from **performance / compliance audits, design & specification, project management, portfolio management and special services.**

In particular, the **exclusive MEC Project Management Plan** covers all critical aspects of managing your project, to ensure **nothing is left to chance**. We keep our **customers involved and fully informed** all the way through the project.

With our **in-depth knowledge** of the vertical transport industry, **MEC delivers the quality services** required based on our awareness of and involvement in the **management of elevator companies** locally and internationally.

MEC understands elevator companies, procedures and products. We **integrate** this knowledge with the **customers needs and projects requirements** using the latest technology and industry knowledge.

You can **choose MEC with confidence**, with the knowledge that you have the **best team** working for you, applying the **latest industry know-how and technologies** to ensure the **best outcome** for your project.

Performance / Compliance Audits

Are you sure your lift system is performing to requirements? Are you NBN ready? MEC can **review and audit your current lift and service provider.**

Design & Specification

Using **innovative design and traffic analysis tools**, MEC can assist in the **design of the lift system** to ensure **optimum performance** based on the **latest technology.**

Project Management

Managing the whole process **can be a daunting task**. Using the **MEC Project Management Plan** the **whole process is project managed and controlled** on our customers behalf.

Portfolio Management

Whether it is one lift or a portfolio of buildings, the **management of the ongoing services** requires regular **review** and scrutiny. MEC knows what can and should be provided and will ensure the customer **receives the quality service** they paid for.

Special Services

MEC provides **specialist services** as the need arises, including **insurance claims, accident investigation, expert witness, on-site contractor management** and **technical and strategic advice.**

Minc Elevator Consulting selects the **most suitable lift company**, we do this by reviewing 6 key operational attributes — **Personnel, Parts, Products, Processes, Performance and Price.**

Let us exceed your expectations. Contact MEC and let us manage it all for you.

Why Minc Elevator Consulting (MEC)?

Experience

With over **100 years involvement** in the lift industry locally and internationally the team at Minc Elevator Consulting (MEC) have a vast amount of experience in all facets of the industry, in particular the costs, operations, management and technical aspects. MEC knows the people, processes and products of the lift industry and applies that knowledge to ensure the best possible solutions for our customers. **At MEC you can buy experience.**

Quality

With all partners trained and accredited in quality business methods and quality auditing accreditation, MEC applies these skills to the way they manage their business.

Minc has **CM3** and **Pegasus** Workplace Health and Safety accreditation, combined with ISO 9001-2015 accreditation. You can confidently call on MEC to look after your needs.

Services and Systems

MEC has developed **unique systems** to cover all aspects of managing your vertical transport requirements. These systems assist in **planning, designing, detailing, actioning and monitoring** all critical aspects of your vertical transport to ensure it is operating with a minimum of fuss, safely and efficiently. The MEC systems guarantee that nothing is left to chance. We keep our **customers involved and fully informed** at all stages of any service they select, from the very start, design, installation, maintenance, modernisation and / or replacement of your vertical transport. **We manage it all for you.**

Immediate Results

If your system is underperforming, MEC applies the knowledge and backing of industry experience and expertise to ensure you have the right team looking after your assets. **Our balanced selection criteria** ensure the best possible service provider is selected. In addition the **MEC Initial Overhaul Program** is a tried and proven 10 step process that can **improve the system and service** provided whilst long-term strategies and options are investigated.

Network

Quality engineering and trades' support is at the heart of Minc.

With over **3000 customers** around Australia and an approved trades and support team of over **1500** specially selected and qualified trades people, MEC is uniquely placed to cover all aspects of **any additional services** you may require for your building.

National & International

MEC can serve your needs in all major cities around Australia and **in many international locations** around the world. The Minc network in Australia spans over 10 locations and now provides the extra services to look after your vertical transport needs.
